About Us

Goleudy Systems is one of the world′s leading suppliers of Manufacturing Execution Systems (MES), that is, configurable software solutions that help manufacturing companies achieve measurable improvements in efficiency, output, compliance, quality and customer satisfaction. Since 2005 Goleudy Systems has been a wholly owned subsidiary of Mobile Industries Ltd.

Our latest MES solution, Shopfloor-Online, provides integrated real-time information from across the entire manufacturing environment. As it is a web-based application, the view can be shared with all company employees, not just plant-wide but world-wide.

We work with some of the biggest names in manufacturing, such as Toyota, Nissan and Volvo in the automotive area; Airbus in aerospace; Crown and Rexam in packaging; as well as many other clients. Our Head Office is in West Sussex where we have a team of developers, project engineers and sales account managers. We also have offices in America and Singapore.

Student Roles at Goleudy

Working for Goleudy you will have the opportunity to …

- learn and implement scripted interfaces to factory devices, databases and ERP systems;
- develop web-pages that represent a factory layout, allowing operators to interact through a point and click interface;
- work with customers to help diagnose and resolve issues, often connecting up to remote sites via VPN links and remote control screens;
- engage in the test process for product release;
- write complex SQL queries on the Shopfloor-Online database to provide end-user reports;
- write stored procedures for Oracle and SQL-Server;
- observe, and be part of, the development and delivery cycle of a commercial software application;
- make site visits around the UK and Europe, to be part of the on-site delivery and implementation team
- be part of a highly skilled and dedicated team

We believe in placing students in a challenging environment in which they are allowed to, and expected to, take on a lot of responsibility and from which they will learn a great deal. The more keen and capable you are, the more experience you will gain. The work is varied, challenging and engaging. Our hope is that those that do well will return to the company after they graduate! A high

percentage of the team currently at Goleudy Systems have come through this programme.

Do you fit the bill?

We only take students from computer related courses, such as Computer Science and Business Information Systems.

You will be a high achiever with excellent semester grades and be passionate about making a difference in a software related industry. We are looking for individuals with a proven flair for development and an enthusiasm for keeping pace with technology.

You will be working in a team, and will be involved in direct customer contact, so you will need to be confident and a good communicator. You need to be prepared to be away for up to 5 days at a time as you may need to assist with on-site customer visits. Due to the location of our Head Office your own transport and a Full UK driving license is desirable but not essential.

Salary, Location, Benefits

The salary for this position is £18,200 per annum. This is a 12 month fixed-term contract (37.5 hours a week).

You will receive 26 days holiday per year, plus public holidays. We offer a contributory company pension, private health care, and subsidised staff canteen.

How To Apply

If you are interested in a placement year position at Goleudy Systems, please send your CV, including details of GCSE, A level and 1 st year grades, together with a covering letter, to cs-iy-admin@aber.ac.uk

Interviews will be conducted at Gregynog Hall in October.
